Statement from the director on the Final report of the IPE CAS

I am pleased to confirm that the evaluation of the Institute of Photonics and Electronics of the Czech Academy of Sciences conducted by the Commission 2 (Physical sciences) and Commission 7.1 (Engineering and technology) was in accordance with the Methodology of Evaluation of Research and Professional Activity of Research-Oriented Institutes of the Czech Academy of Sciences for the Period 2015–2019.

I would also like to use this opportunity to thank all the members of the evaluation commissions for their efforts. We appreciate the feedback provided by the commissions and shall strive to continue developing our Institute as an “*excellent environment to conduct highly competitive multidisciplinary fundamental and applied research*”. We find the main comments and recommendations in agreement with the outcomes of internal evaluations and we shall be undertaking steps to implement the recommendations into the Institute’s development plans for the next period. Therefore, on behalf of the Institute, I accept the findings in the Final report and raise no objections concerning the Final report and the evaluation process.

Pavel Honzátko, Ph.D.
Interim director
