Statement from the Director of the Institute on the final report of the Commission No. 3

The performance of the Astronomical Institute of the Czech Academy of Sciences during the institutional evaluation period 2010-2014 was examined by the Commission No. 3 - Physical Sciences.

We are thrilled to learn that the Institute receives this positive evaluation and we consider our result as a commitment for future. Heads of Scientific Teams are informed about recommendations in corresponding sections of the final report.

Astronomical Institute accepts the report as a whole.

Yours sincerely,

Prof. Vladimír Karas, DrSc.  
Director of the Institute
